

Stage-spell effect before and after process frailty

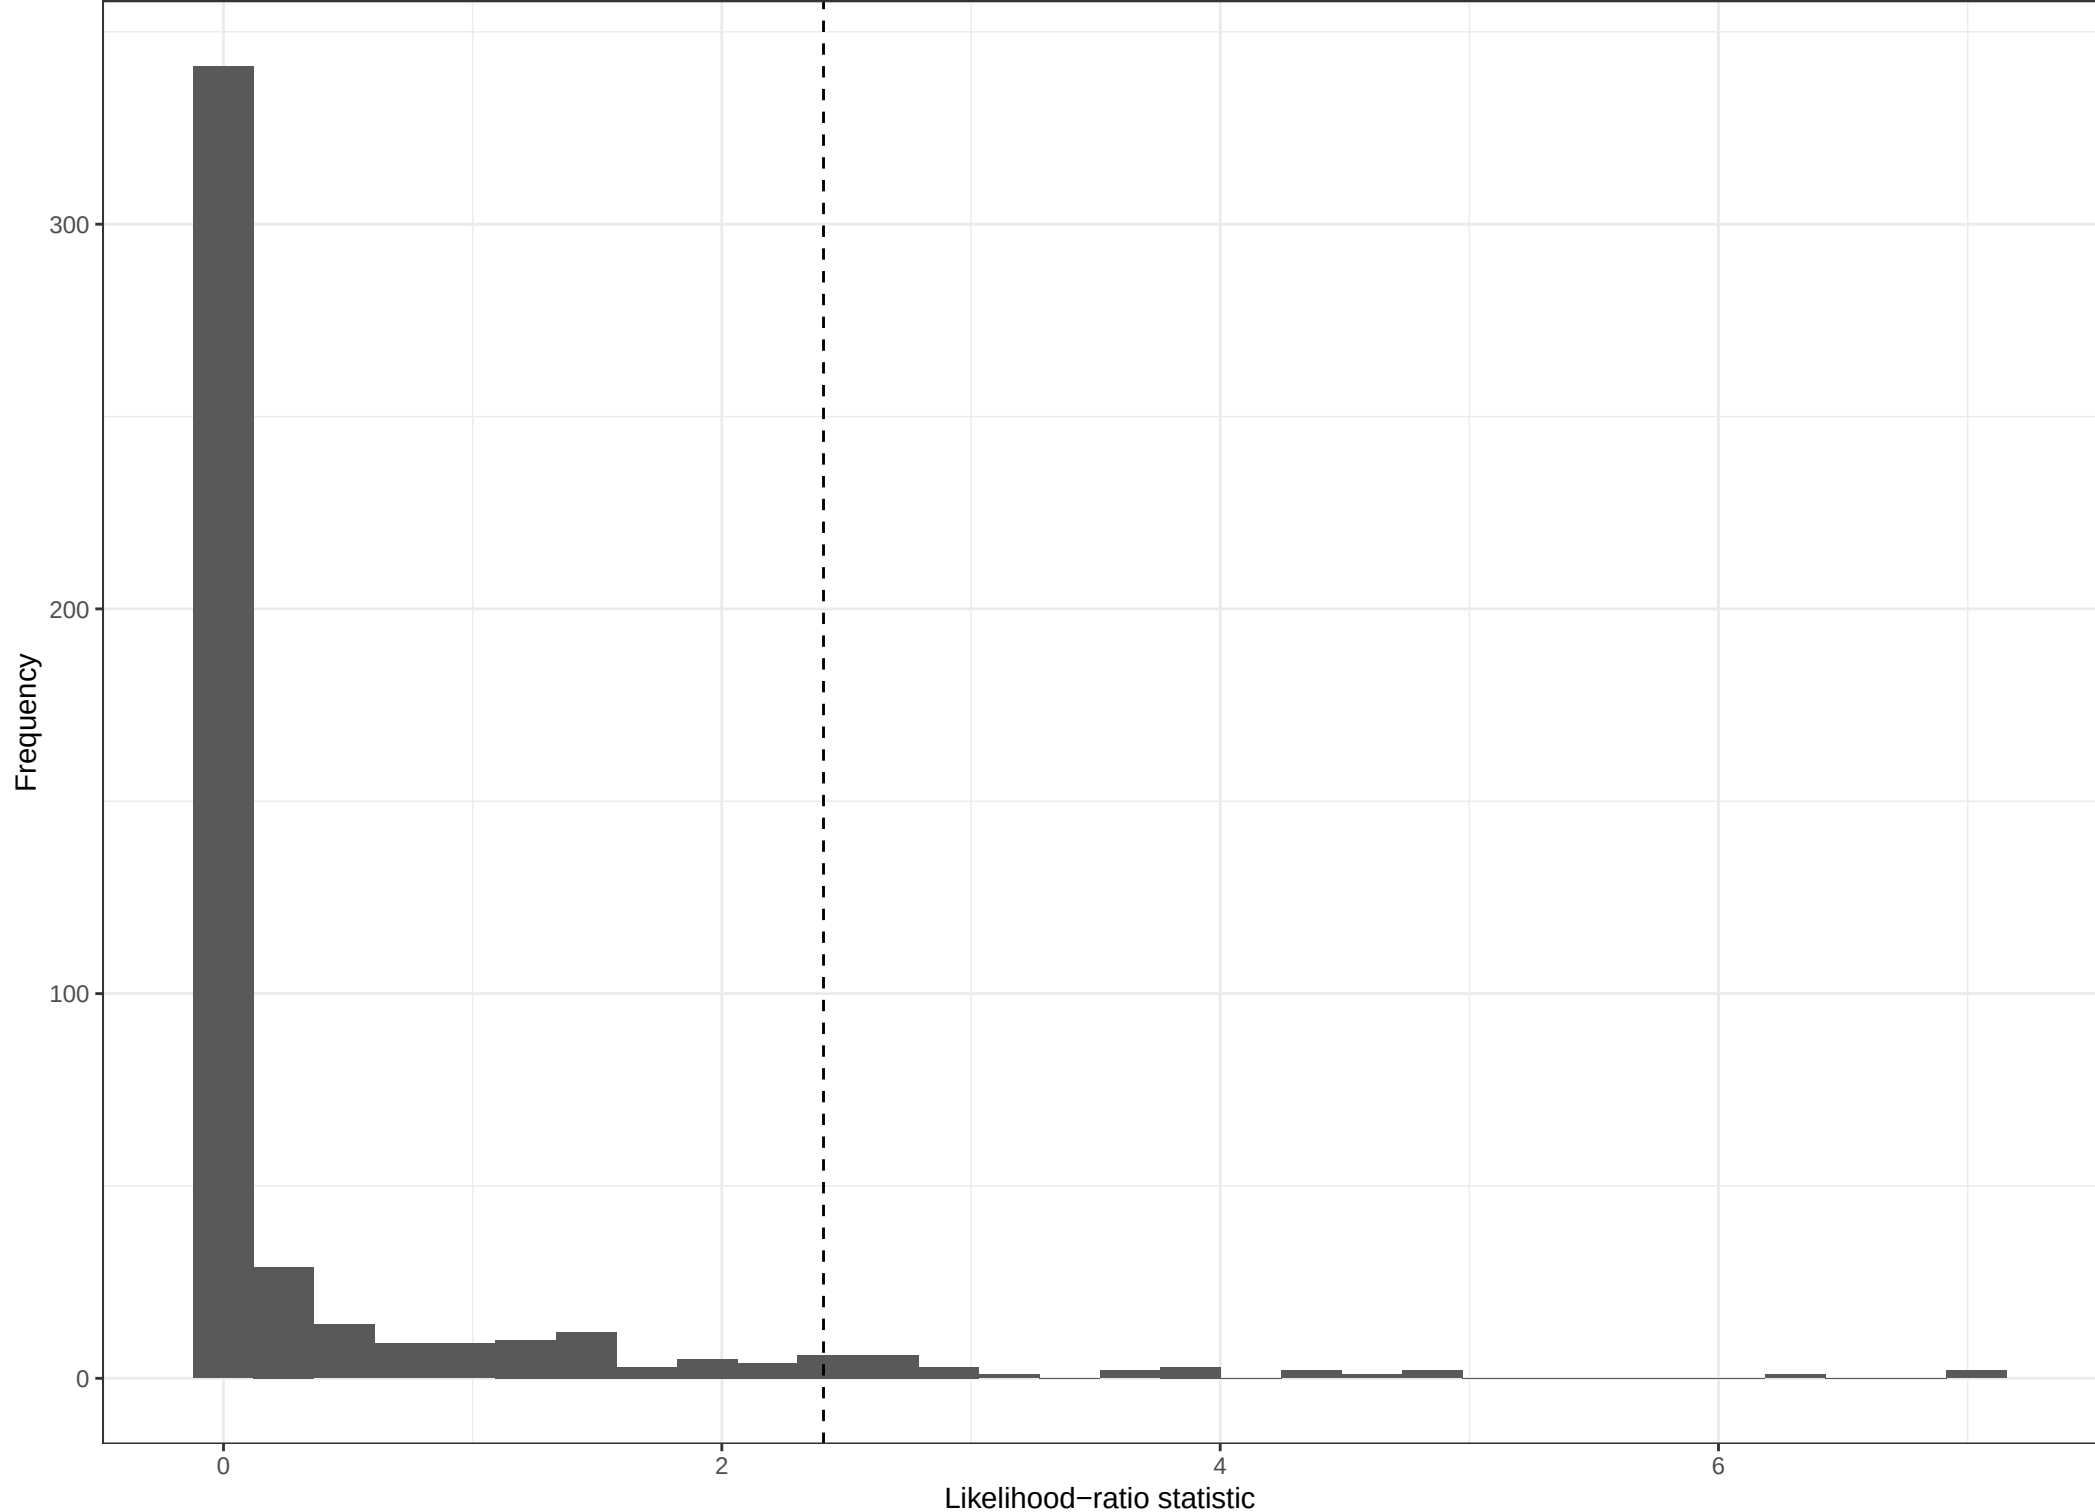

Estimated peace-process random intercepts

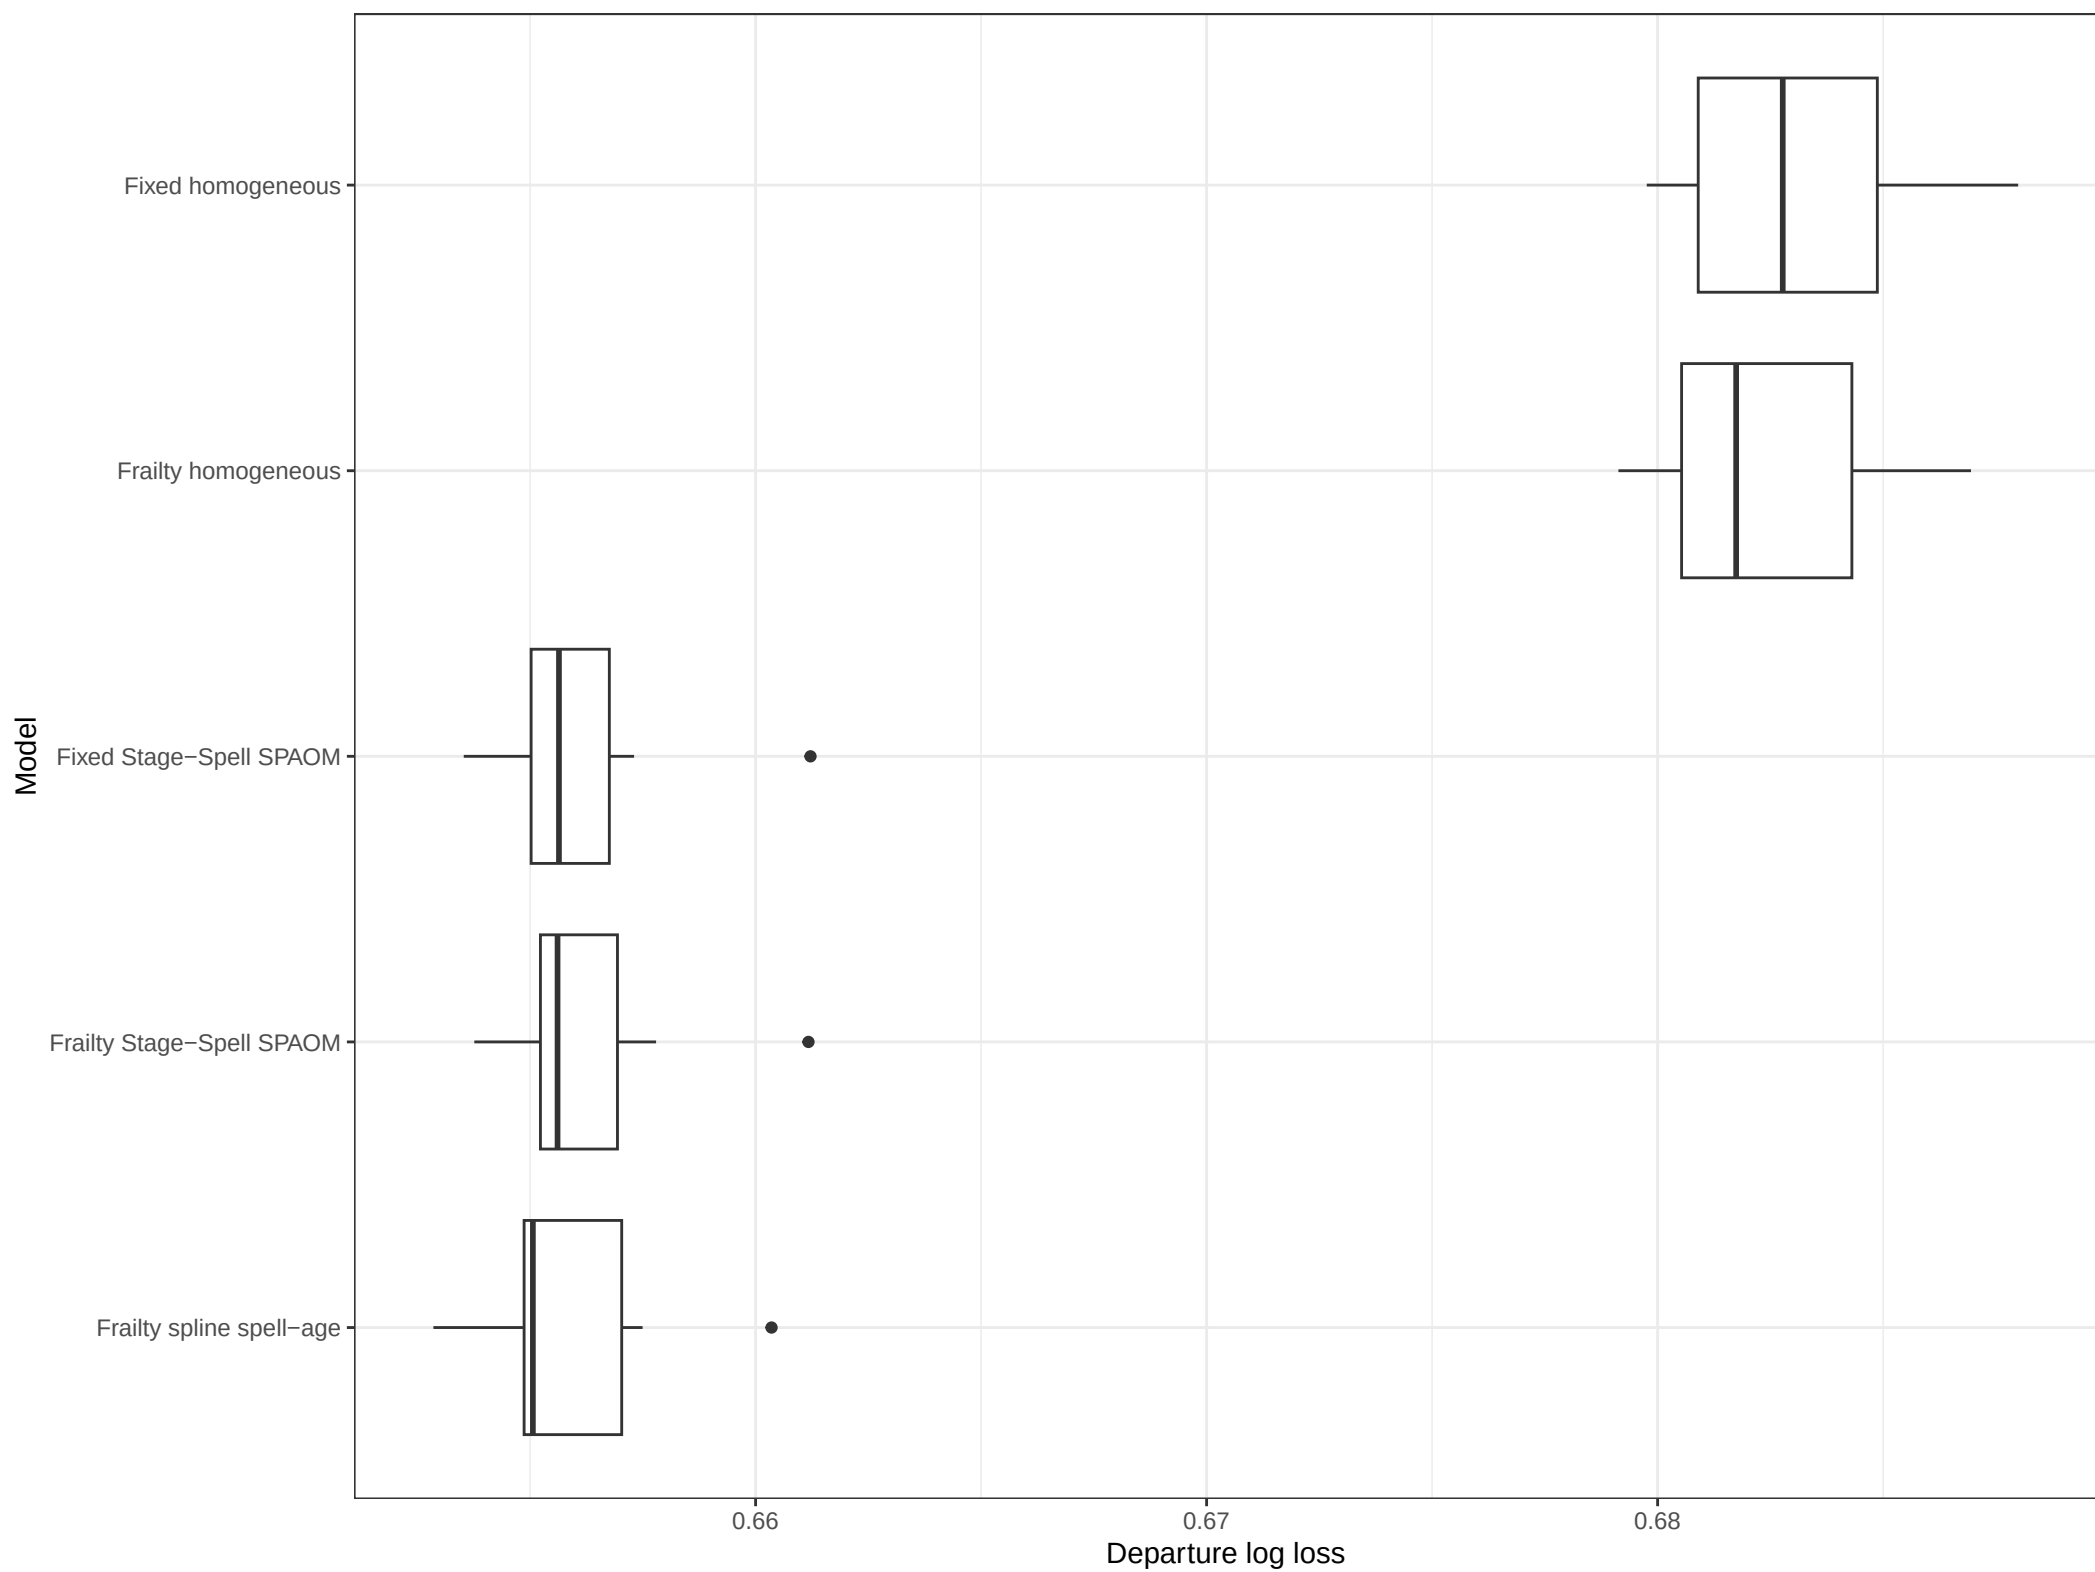

Process-bootstrap distributions for the frailty sensitivity model

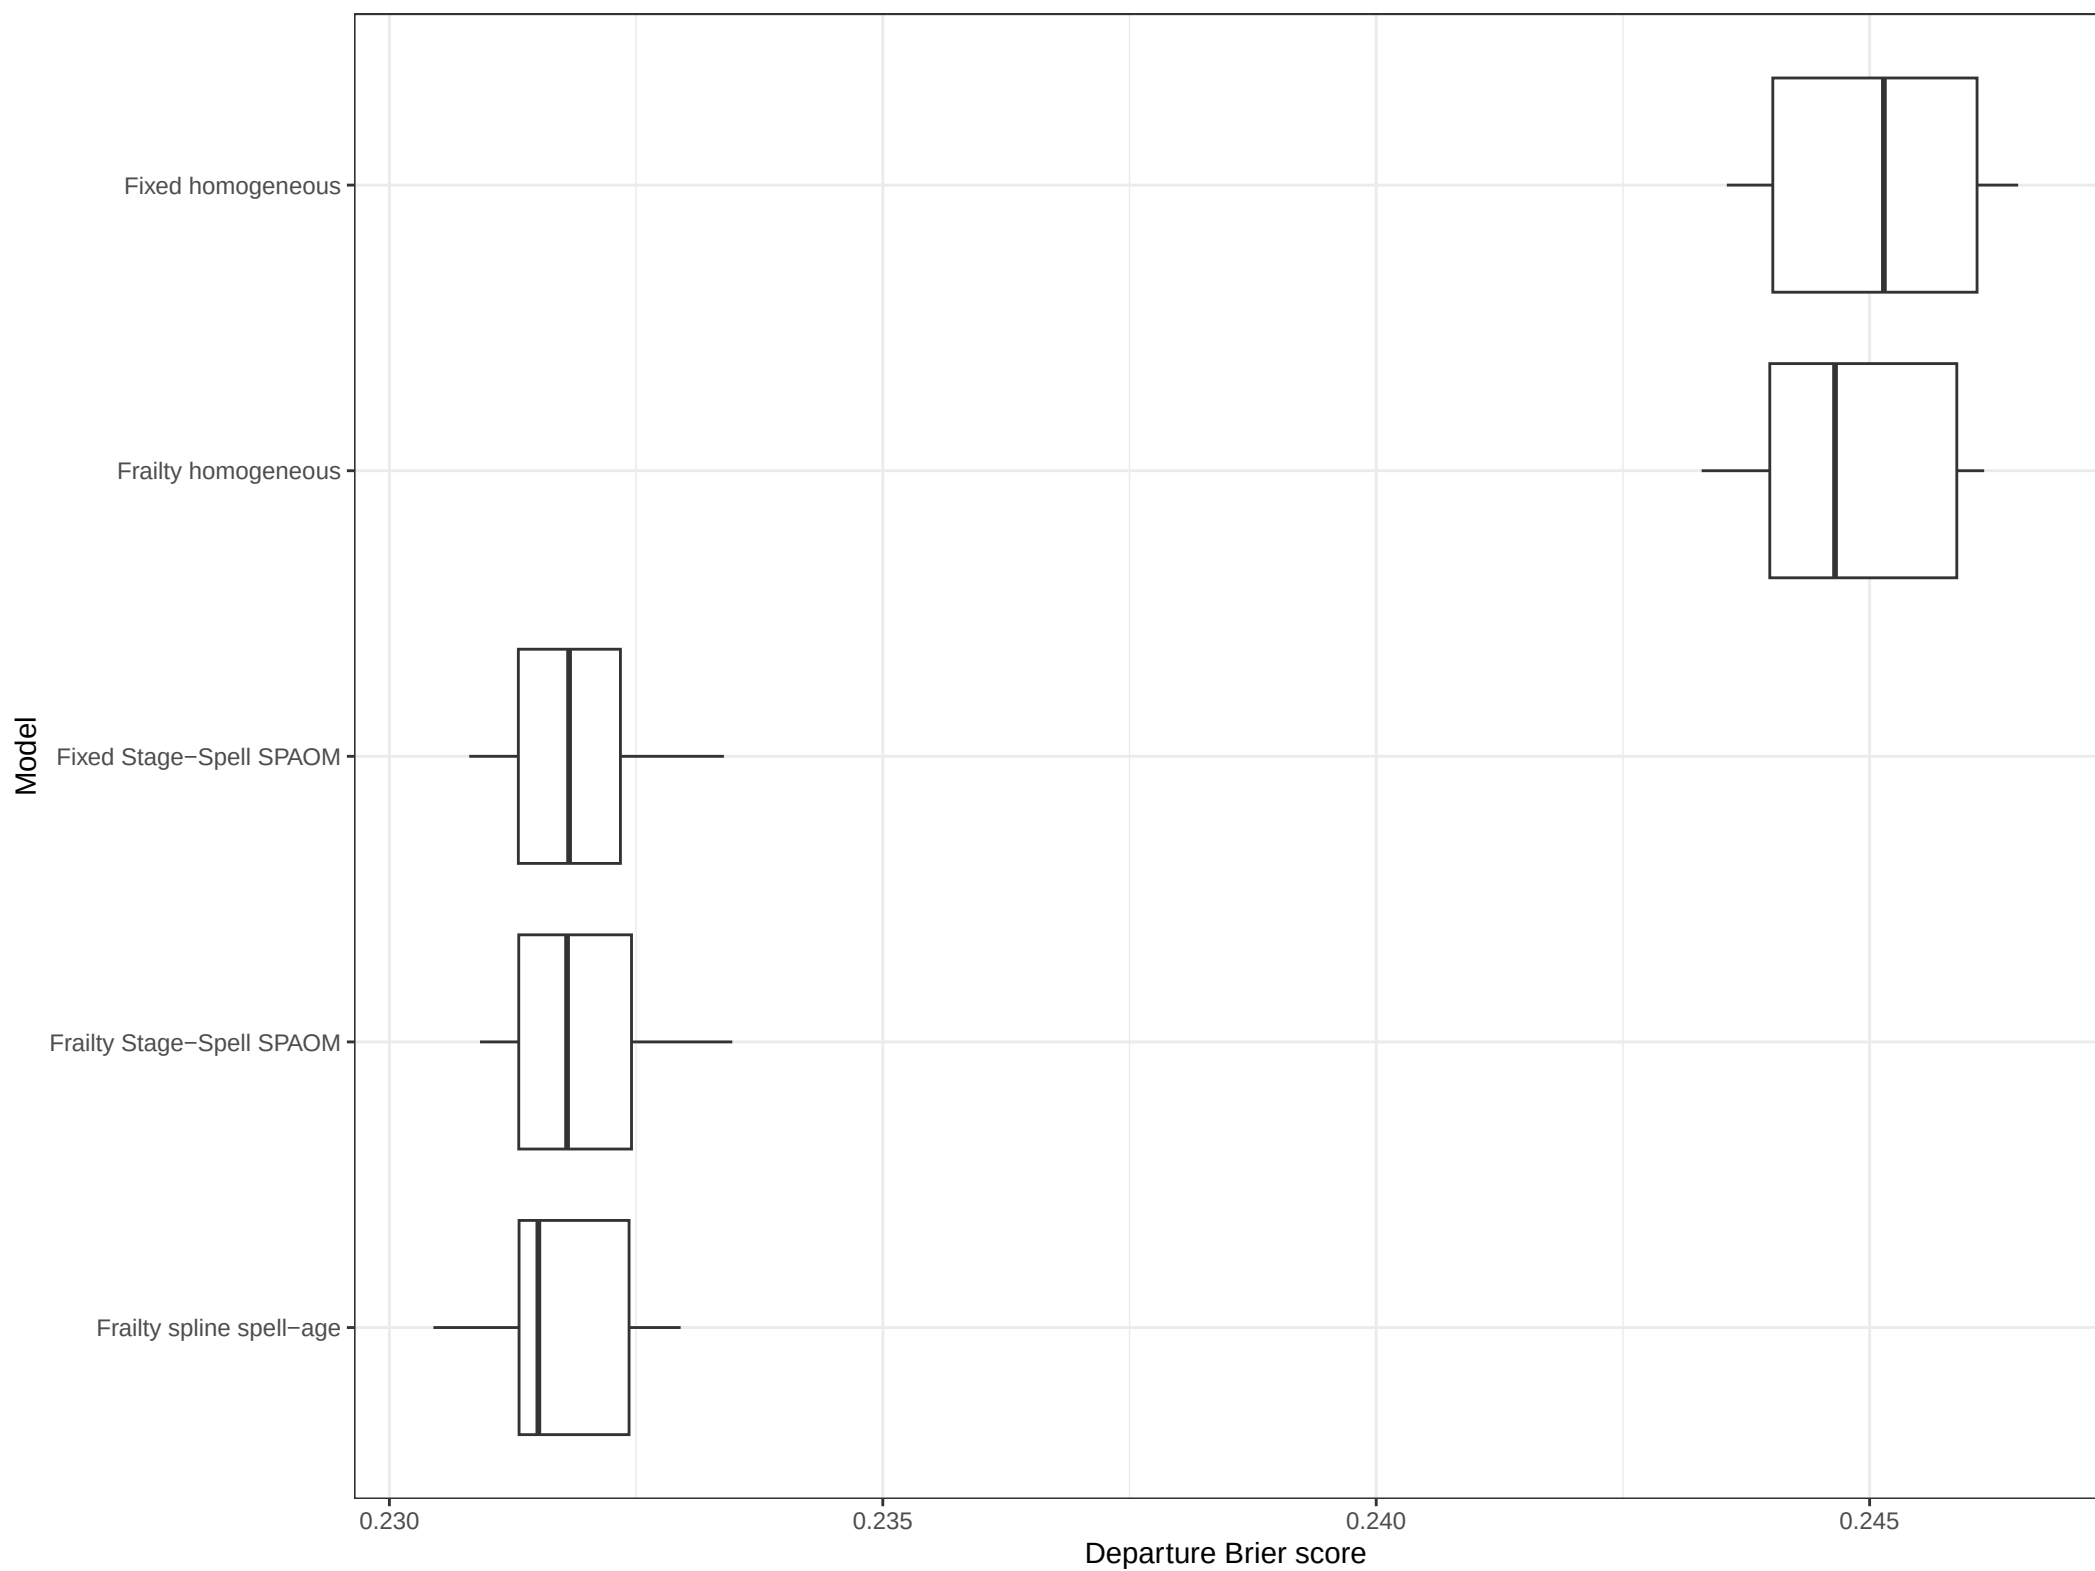

Parametric-bootstrap test of the process-frailty variance
Dashed line marks the observed likelihood-ratio statistic

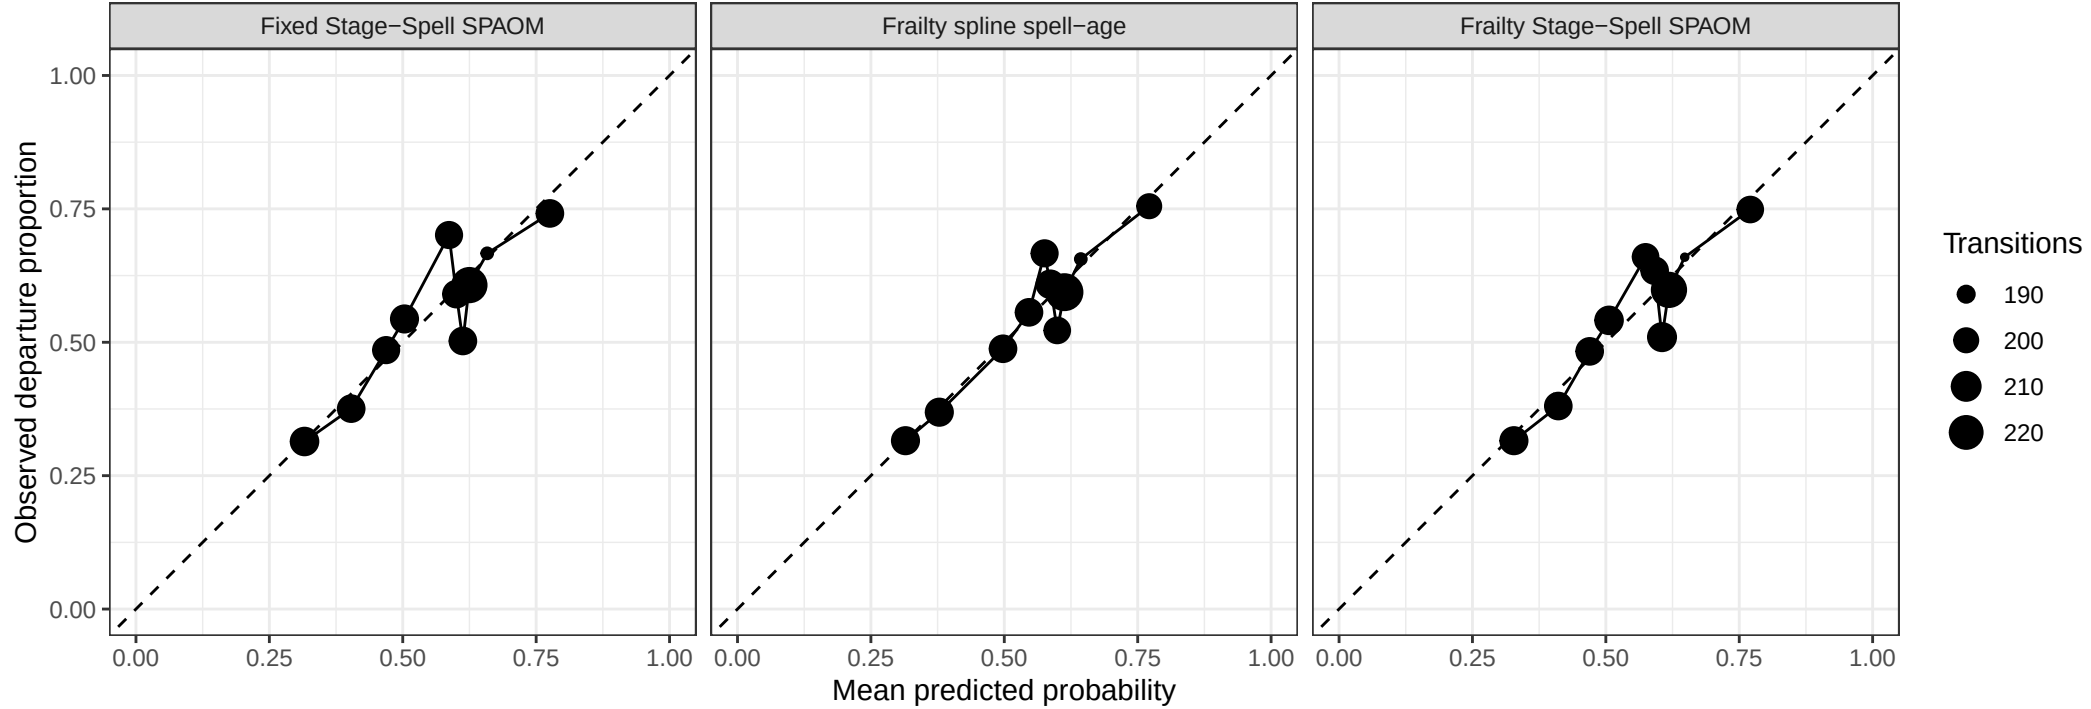

Grouped cross-validated departure log loss

Grouped cross-validated departure Brier score

Marginal cross-validated departure calibration

Paired predictive advantages of the frailty SS-SPAOM

Positive values favour the frailty model
